

# PINELANDS / HUGH WARD BOULEVARD

Mendrop~Wages was the Engineer of Record for a private developer which had plans to develop a parcel of land located in Rankin County, Mississippi. The proposed development includes approximately 420 acres of residential development and 200 acres of commercial development.

As part of this development, planning, environmental permitting, preliminary, conceptual and final design services, and construction management services were provided by Mendrop~Wages for a two mile, four lane divided curb and gutter arterial. This connector provides a connectivity between Spillway Road and Mississippi Highway 25 as well as access to the residential and commercial development. The connector, which was designed in accordance to MDOT urban standards, included the upgrade of an existing signalized intersection at Mississippi Highway 25 to a mast arm design, numerous at grade intersections, storm drainage systems and right-of-way plats.

Mendrop~Wages was responsible for the following:

- Roadway Design Services
- Subdivision Design Services
- Construction Management
- Topographical Design Surveys
- Construction Staking
- Right-of-Way Plats
