

# TOYOTA

Mendrop~Wages serves as the lead engineer for the State of Mississippi for the site and infrastructure planning in the recruitment of Toyota to Mississippi. Mendrop~Wages' extensive experience in working with the State as the Engineering Manager for the Nissan Project and on other industrial recruitment projects gave the State confidence in our abilities to properly plan and present the concepts to Toyota team officials during the recruitment. Mendrop~Wages has now been engaged by the State to implement and oversee the design and construction of the infrastructure and to coordinate with Federal, State and Local Agencies.

The responsibilities to the State of Mississippi for this project have included multiple disciplines to manage such a fast pace project. Some of those responsibilities include but are not limited to the following:

- Management of all sewer and water infrastructure improvements
- Management and coordination of roadway improvements with local officials and MDOT
- Management and day-to-day coordination with the Toyota site development team to insure that goals are being met
- Coordination and implementation of environmental and right-of-way needs
